## LESSON 21

## Salty Eights Formulas for Ionic Compounds

Name	
Date	Period

## **Purpose**

To practice creating and naming ionic compounds.

## **Instructions**

- **I.** Use the cards to play Salty Eights. List your compounds in the table. If you use more than one atom of an element, put the number in the formula (example: Li<sub>2</sub>S—lithium sulfide).
- **2.** Name the compounds (change the ending of the second element to "-ide.")

Cation	Anion	Compound formula	Compound name	Point value
			Total:	

**3. Bonus Question** Determine the compound with the highest point value you could make with these cards. Name that compound.
